

A BRIEF ON COMMISSIONING OF 5th and 6th LINE BETWEEN MOORE MARKET COMPLEX (MMC) AND BASIN BRIDGE JUNCTION (BBQ) AND REPERCUSSION ON TRAINS SERVICES FROM 23/08/16 TO 07/10/16 (46 Days)

1.1 Background

MMC Terminal serves as the hub of suburban passengers dealing with EMU trains from Arakkonam (AJJ) and Gummidipoondi (GPD) and also connects the Chennai Central Station. A total of about 2 Lakhs passengers through 260 suburban EMU trains are handled per day at MMC.

Movement of trains in the MMC-BBQ corridor is however already constrained severely since the track infrastructure is shared with long distance Mail/Express and Passenger trains reaching and starting from the Chennai Central Station. There is considerable criss-cross movement already at BBQ resulting in the suburban trains as well as the Mail/ Express and Passenger trains from AJJ & GPD are detained at Home signals due to conflicting movements. This bottleneck formation at BBQ is not only increasing the commuting time for passengers but also posing a severe constraint in introduction of new services.

1.2 The Project

Accordingly, the work of “Provision of 5th and 6th lines between Moore MMC and BBQ” has been sanctioned at a cost of Rs.30.53 crores. The scope of this critical project includes remodeling of BBQ yard and MMC Yard, construction of the 5th and 6th lines between MMC & BBQ and provision of two additional platforms at MMC. The work is targeted for completion in this financial year itself.

Provision of the 5th & 6th lines between MMC & BBQ will provide separate corridor for EMU train towards Arakkonam direction to ensure un-interrupted movement of the suburban trains thereby reducing commuting time for the passengers besides enhancing the sectional capacity, which will improve the throughput of the section. In addition there will be increased mobility for Mail/Express and Passenger trains terminating and originating at Chennai Central since a number of crossovers will be removed and higher speed will be attained, thus considerably improving punctuality.

1.3 Execution of Work

Commissioning of 5th & 6th line involves major changes in track layout at Moore Market Complex and Basin Bridge Junction, installation of new Signalling arrangements and erection and alignment of Overhead Traction equipments in MMC and BBQ area. To carry out these major changes and to create new infrastructure, the work was in progress without any disruption to train services for last six months.

The project has entered into final phase of commissioning which requires daily 5 hours Traffic Block during nights hours (from 2300 hrs to 0400 hours) and mega traffic Blocks at Moore Market Complex station from 0000 hrs of 17/09/16 to 0400 hrs of 19/09/16 for 52 hours.

Apart from the traffic Blocks, the changes in yard layouts necessitates the restriction on movement of trains in some directions. Due to traffic blocks and change in yard layouts, there is a need to change the pattern of Suburban as well as Mail/ Express trains. Change in pattern of train services includes cancellation and diversion of Suburban services, diversion of Mail/express trains Via Perambur-Vyaserpadi –Korukkupet. The final Phase of execution of 5th and 6th line between MMC & BBQ is spread over 46 days from 23/08/2016 to 07/10/2016.

The major changes in pattern of suburban services from Moore Market Complex towards Arakkonam are from 13/09/2016 to 18/09/2016 (6 days.). Whereas the major changes in the pattern of suburban services from Moore Market Complex to Gummidipundi/ Sullurupetta is from 13/09/2016 to 26/09/16 (14 days). As regards Mail/Express trains, 2 daily, 3 Tri weekly, 5 Bi-weekly and 7 weekly trains are diverted Via Perambur and T.No 12840 Chennai Central –Howrah Train is slated to be started from Chennai Beach during this period from 06/09/16 to 07/10/2016 (32 Days)..
